

Satellite TV is available to every unit; however you must arrange to hook up to the Association's dish array. No individual satellite dishes are permitted. The cost to run and maintain the coaxial cable from the Association's multi-switch to the individual unit is the responsibility of the resident. It has come to the Boards attention that there are some "illegal" satellite TV hook-ups that are not going into the Alexandria dish array. This is strictly PROHIBITED. Any resident in violation of this edict must have the offending dish removed and contact Audio Café. Failure to do so will result in the forfeiture of the dish. In addition, any damage incurred to any of the common areas as a result of the illegal hook-up will result in assessments being levied against that unit owner's account for the costs associated with the repairs. You may reach Audio Café by calling 908-482-4220.
